## **JOB VACANCY**

**JOB TITLE:** Offshore Field Manager  
**LOCATION:** Yumna Field – Block 50 Offshore Oman

---

### **MASIRAH OIL**

Masirah Oil is an exploration and production company who operates Block 50 offshore Oman. Masirah Oil has invested heavily in Block 50 acquiring and interpreting 3D seismic data and completing an 8 well exploration and appraisal program. Focus is now on operating and further developing the Yumna oil field which comprises of a Mobile Offshore Production Unit, Storage Tanker and 3 wells completed with Electrical Submersible Pumps.

Fundamental to the future success of Masirah Oil will be its people. Their expertise, knowledge, experience and commitment are necessary to continue to safely and cost effectively optimize production operations from the Yumna field, the first offshore Oil Production of the East coast of Oman.

### **JOB DESCRIPTION**

- Overall responsibility of Field operations including Mobile Offshore Production Unit (MOPU) and the Storage Tanker (oil storage, produced water discharge & oil export terminal), so that they are carried out as per operational plans, safely and in a timely manner safeguarding facilities' integrity and the environment.
- Authority to authorize, cancel, suspend or prevent any production activity on board of MOPU and Tanker, which may affect the safety of the installations or personnel involved.
- Overall control over the Field operation with regards to the support vessels and other vessels approaching and entering the 500 m zone.
- Responsibility for the implementation of the company's HSE Management System for offshore operations, ensuring compliance by all employees and by all sub-contractors.
- Compliance with the conditions stated on the Environmental Impact Assessment Approval for Block 50 and other regulations in compliance with Environmental Authority and the Ministry of Energy and Minerals.
- On-Scene Commander, primary contact and in charge of the Site Emergency Response Team, as per the company's Emergency Response Plan.
- Compliance with the reservoir and production monitoring plan to acquire all required surface and subsurface data, and timely and accurate daily production reporting.

### **QUALIFICATION**

- 15+ years' experience in offshore E&P operations
- Expertise in commissioning and operating Mobile Offshore Production Units
- Experience in commissioning and operating offshore process equipment
- Experienced in managing offshore field logistics including scheduling of supply boats
- Experience in offshore tanker loading and discharging operations
- Bachelor's degree in Petroleum, Chemical or Mechanical Engineering
- Excellent communicator.
- Fluency in English.
